

MAISHA HIV AND AIDS CONFERENCE 2019: GET INVOLVED

The National AIDS Control Council is set to host the Fifth Maisha HIV and AIDS Conference whose theme is “*Leveraging the HIV Response to Accelerate Impact for UHC.*” The Conference is scheduled to take place from May 9-10, 2019 at the Kenya School of Monetary Studies in Nairobi, Kenya.

The Maisha HIV and AIDS Conference 2019 is yet another opportunity for researchers and HIV Response partners to engage in discourse on the Response, which will commence with Pre-conference Meetings organized along specific thematic areas aligned to the Conference objectives. A total of six (6) such meetings will be held: *The Adolescents and Young People (AYP) Advocacy Forum; Women Opinion Leaders Forum; National MIPA Forum; County Inter-Faith Chairs Meeting; Joint AIDS End Term Review Meeting (JAETR); and Strengthening PPPs for Enhanced Private Sector Service Delivery Within the UHC Agenda.* These meetings will contribute directly in content, output and outcomes to the Conference programme.

The Conference will provide a platform for evidence-based discussions and deliberations on how best to address the existing challenges within the HIV programme and opportunities available that can be harnessed in order to achieve Universal Health Coverage as a country.

The objectives of the Maisha HIV and AIDS Conference 2019 include:

- i. To review progress, and identify next steps for accelerating HIV prevention and treatment targets attainment.
- ii. To identify lessons, opportunities and critical drivers for the HIV response that can be used to accelerate UHC targets.
- iii. To identify specific actions by different constituents in the HIV response that can be leveraged to accelerate UHC.
- iv. To identify potential challenges for HIV programming in the scale-up of UHC and propose mitigation measures for achievement of UHC in Kenya.

The two-day Conference includes panel sessions and plenary presentations featuring various speakers and presenters. Partners will also showcase their various achievements in the HIV response.
